PIA Short-Term Securities Fund

Dear Shareholder:

We are pleased to provide you with this annual report for the fiscal year from December 1, 2020 through November 30, 2021, regarding the PIA Short-Term Securities Fund (the “Fund”) for which Pacific Income Advisers, Inc. (“PIA”), is the investment adviser.

For the fiscal year ended November 30, 2021, the total return for the Fund, including the reinvestment of dividends and capital gains, was 0.11%. The Fund’s return exceeded the Fund’s benchmark index, the ICE BofA 1-Year U.S. Treasury Note Index, which returned 0.04% for the same period.

As stated in the most recently filed prospectus, the Fund’s gross expense ratio is 0.42% and the Fund’s net expense ratio is 0.39%. PIA has contractually agreed to waive all or a portion of its management fees and pay Fund expenses to ensure that the Total Annual Fund Operating Expenses After Fee Waiver (excluding acquired fund fees and expenses) do not exceed 0.39% of the Fund’s average daily net assets through at least March 29, 2022. The net expense is what the investor has paid.

The Fund’s investment objective is to seek a high level of current income, consistent with low volatility of principal through investing in short-term investment grade debt securities.

During the fiscal year ended November 30, 2021, the Fund had a neutral duration relative to the Fund’s benchmark index. The Fund’s outperformance versus the benchmark during the period is primarily attributable to the Fund’s weighting in investment grade corporate debt securities. We increased the percentage of floating rate securities in the Fund during the period, in anticipation of short-term interest rate increases by the Federal Reserve in 2022.

Please take a moment to review the Funds’ statements of assets and liabilities and the results of operations for the fiscal ended November 30, 2021. We look forward to reporting to you again with the semi-annual report dated May 31, 2022.

A handwritten signature in black ink, appearing to read "Lloyd McAdams". The signature is written in a cursive, flowing style.

Lloyd McAdams
President and Portfolio Manager
Pacific Income Advisers, Inc.

PIA Short-Term Securities Fund

Past performance is not a guarantee of future results.

Opinions expressed above are those of Pacific Income Advisers, Inc., the Fund's investment adviser, are subject to change, are not guaranteed and should not be considered recommendations to buy or sell any security.

Must be preceded or accompanied by a prospectus.

Mutual fund investing involves risk. Principal loss is possible. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in asset-backed and mortgage-backed securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. The Fund may invest in derivatives, which may involve risks greater than the risks presented by more traditional investments. The risk of owning an exchange-traded fund ("ETF") or mutual fund generally reflects the risks of owning the underlying securities that the ETF or mutual fund holds. It will also bear additional expenses, including operating expenses, brokerage costs and the potential duplication of management fees.

Diversification does not assure a profit or protect against risk in a declining market.

The ICE BofA 1-Year U.S. Treasury Note Index (the "Index") is an unmanaged index presented for comparative purposes only. The Index is comprised of a single U.S. Treasury issue with approximately one year to final maturity purchased at the beginning of each month and held for one full month. At the end of the month, that issue is sold and rolled into a newly selected issue. You cannot invest directly in an index.

Gross domestic product is the amount of goods and services produced in a year, in a country.

Consumer Price Index measures the weighted average of prices of a basket of consumer goods and services, such as transportation, food and medical care.

Duration is the measure of the sensitivity of the price of a fixed income security to a change in interest rates, expressed in number of years.

Basis point equals 1/100th of 1%.

Spread is the difference in yield between a corporate bond and a similar maturity U.S. Treasury bond. It is the compensation investors receive for accepting credit risk of a corporate bond.

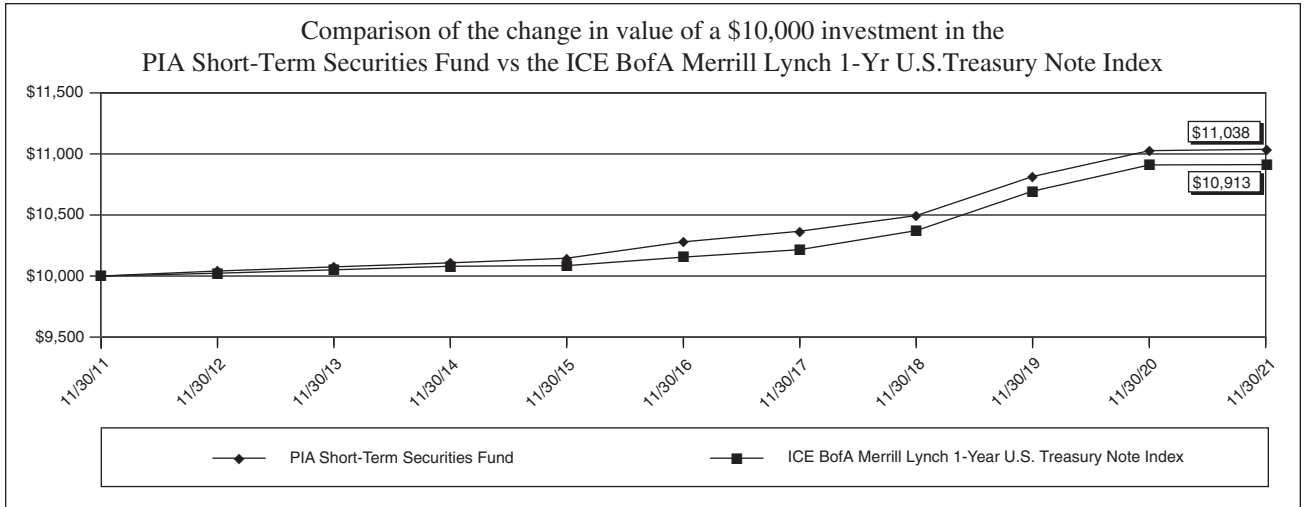

Bond ratings provide the probability of an issuer defaulting based on the analysis of the issuer's financial condition and profit potential. Bond rating services are provided by credit rating agencies currently registered as Nationally Recognized Statistical Rating Organizations ("NRSROs"). Bond ratings start at AAA (denoting the highest investment quality) and usually end at D (meaning payment is in default). Securities not covered by any agency will receive a non-rated (NR) rating.

The option-adjusted spread is the spread earned over Treasuries, measured over multiple possible future interest rate scenarios, after accounting for the value of the embedded option in the security, which in the case of MBS, gives mortgage holders the option to either refinance or repay early.

Please refer to the schedule of investments in the report for complete holdings information. Fund holdings and sector allocations are subject to change at any time and are not recommendations to buy or sell any security. Investment performance reflects fee waivers in effect. In the absence of such waivers, total return would be reduced.

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-800-251-1970.

This chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund ten years ago. Returns reflect the reinvestment of dividends and capital gain distributions. Fee waivers are in effect. In the absence of fee waivers, returns would be reduced. The performance data and graph do not reflect the deduction of taxes that a shareholder may pay on dividends, capital gain distributions, or redemption of Fund shares. This chart does not imply any future performance.

The ICE BofA Merrill Lynch 1-Year U.S. Treasury Note Index is an unmanaged index consisting of a single U.S. Treasury issue with approximately one year to final maturity purchased at the beginning of each month and held for one full month. At the end of the month, that issue is sold and rolled into a newly selected issue.

Indices do not incur expenses and are not available for investment.

* Average Annual Total Return represents the average change in account value over the periods indicated.

PIA Short-Term Securities Fund

Expense Example – November 30, 2021

(Unaudited)

As a shareholder of a mutual fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments, redemption fees, and exchange fees, and (2) ongoing costs, including management fees, distribution and/or service fees, and other fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the PIA Short-Term Securities Fund and to compare these costs with the ongoing costs of investing in other mutual funds. The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (6/1/21 – 11/30/21).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. Although the Fund charges no sales loads or transaction fees, you will be assessed fees for outgoing wire transfers, returned checks, and stop payment orders at prevailing rates charged by U.S. Bancorp Fund Services, LLC, the Fund's transfer agent. The Example below includes, but is not limited to, management fees, fund accounting, custody and transfer agent fees. You may use the information in the first line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is different from the Fund's actual returns. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transaction costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transaction costs were included, your costs would have been higher.

	Beginning Account Value 6/1/21	Ending Account Value 11/30/21	Expenses Paid During Period 6/1/21 – 11/30/21*
Actual	\$1,000.00	\$ 997.80	\$1.95
Hypothetical (5% return before expenses)	\$1,000.00	\$1,023.11	\$1.98

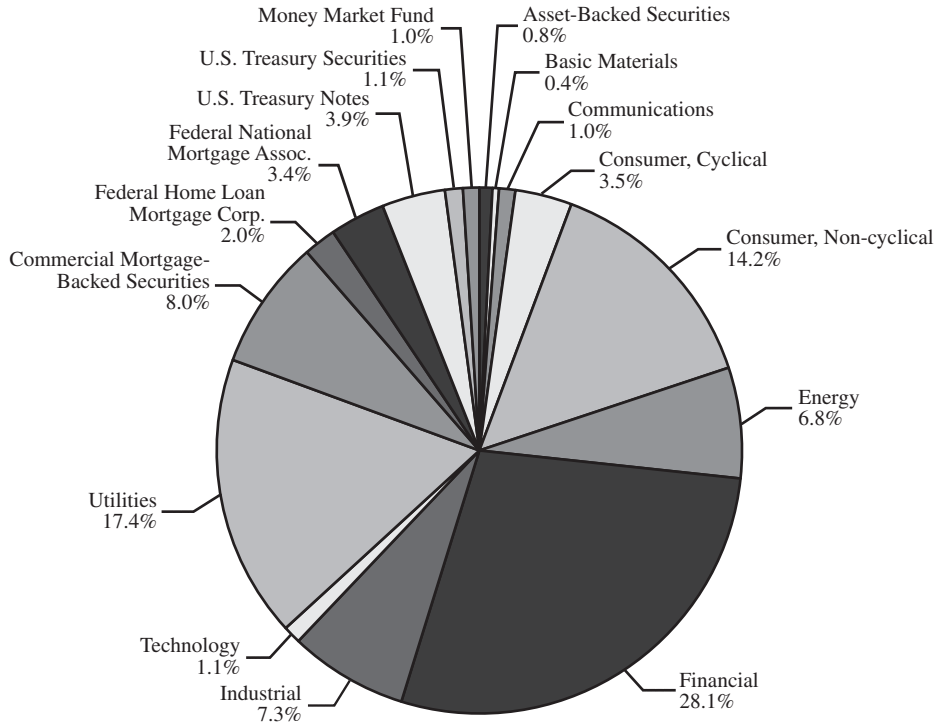

* Expenses are equal to the Fund's annualized expense ratio, multiplied by the average account value over the period, multiplied by 183 (days in most recent fiscal half-year) / 365 days to reflect the one-half year expense. The annualized expense ratio of the Fund is 0.39%.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021

Note 1 – Organization

The PIA Short-Term Securities Fund (the “Fund”) is a diversified series of Advisors Series Trust (the “Trust”), which is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Fund is an investment company and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standard Codification Topic 946 “Financial Services – Investment Companies.”

The investment objective of the Fund is to seek a high level of current income, consistent with low volatility of principal through investing in short-term investment grade debt securities. The Fund commenced operations on April 22, 1994.

Note 2 – Significant Accounting Policies

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. These policies are in conformity with accounting principles generally accepted in the United States of America.

Security Valuation – All investments in securities are recorded at their estimated fair value, as described in Note 3.

Securities Purchased on a When-Issued Basis – Delivery and payment for securities that have been purchased by the Fund on a forward-commitment or when-issued basis can take place up to a month or more after the transaction date. During this period, such securities are subject to market fluctuations. The Fund is required to hold and maintain until the settlement date, cash or other liquid assets in an amount sufficient to meet the purchase price. The purchase of securities on a when-issued or forward-commitment basis may increase the volatility of the Fund’s net asset value if the Fund makes such purchases while remaining substantially fully invested. In connection with the ability to purchase securities on a when-issued basis, the Fund may also enter into dollar rolls in which the Fund sells securities purchased on a forward-commitment basis and simultaneously contracts with a counterparty to repurchase similar (same type, coupon, and maturity), but not identical securities on a specified future date. As an inducement for the Fund to “rollover” its purchase commitments, the Fund receives negotiated amounts in the form of reductions of the purchase price of the commitment. Dollar rolls are considered a form of leverage.

Federal Income Taxes – It is the Fund’s policy to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income or excise tax provision is required.

The Fund recognizes the tax benefits of uncertain tax positions only where the position is “more likely than not” to be sustained assuming examination by tax authorities. The tax returns of the Fund’s prior three fiscal years are open for examination. Management has reviewed all open tax years in major jurisdictions and concluded that there is no impact on the Fund’s net assets and no tax liability resulting from unrecognized tax events relating to uncertain income tax positions taken or expected to be taken on a tax return. The Fund identifies its major tax jurisdictions as U.S. federal and the state of Wisconsin; however the Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will change materially in the next twelve months.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

Expenses – The Fund is charged for those expenses that are directly attributable to the Fund, such as investment advisory and custodian fees. Expenses that are not directly attributable to the Fund are typically allocated among the PIA Funds in proportion to their respective net assets. Common expenses of the Trust are typically allocated among the funds in the Trust based on a fund’s respective net assets, or by other equitable means.

Securities Transactions and Investment Income – Security transactions are accounted for on a trade date basis. Realized gains and losses on sales of securities are calculated on the basis of identified cost. Interest income is recorded on an accrual basis. Discounts and premiums on securities purchased are amortized over the life of the respective security using the effective interest method, except for premiums on certain callable debt securities that are amortized to the earliest call date. Paydown gains and losses on mortgage-related and other asset-based securities are recorded as components of interest income on the Statement of Operations.

Distributions to Shareholders – Distributions to shareholders are recorded on the ex-dividend date. The Fund distributes substantially all net investment income, if any, monthly and net realized gains, if any, annually. All short-term capital gains are included in ordinary income for tax purposes.

Reclassification of Capital Accounts – Accounting principles generally accepted in the United States of America require that certain components of net assets relating to permanent differences be reclassified between financial and tax reporting. These reclassifications have no effect on net assets or net asset value per share. For the year ended November 30, 2021, there were no reclassifications between paid-in capital and distributable earnings.

Guarantees and Indemnifications – In the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund’s maximum exposure under these arrangements is unknown as this would involve future claims against the Fund that have not yet occurred. Based on experience, the Fund expects the risk of loss to be remote.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operation during the reporting period. Actual results could differ from those estimates.

Accounting Pronouncements – In March 2020, FASB issued ASU 2020-04, *Reference Rate Reform: Facilitation of the Effects of Reference Rate Reform on Financial Reporting*. The main objective of the new guidance is to provide relief to companies that will be impacted by the expected change in benchmark interest rates at the end of 2021, when participating banks will no longer be required to submit London Interbank Offered Rate (“LIBOR”) quotes by the UK Financial Conduct Authority. The new guidance allows companies to, provided the only change to existing contracts are a change to an approved benchmark interest rate, account for modifications as a continuance of the existing contract without additional analysis. In addition, derivative contracts that qualified for hedge accounting prior to modification, will be allowed to continue to receive such treatment, even if critical terms change due to a change in the benchmark interest rate. For new and existing contracts, the Fund may elect to apply the amendments as of March 12, 2020 through December 31, 2022. Management is currently assessing the impact of the ASU’s adoption to the Fund’s financial statements and various filings.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

In October 2020, the Securities and Exchange Commission (the “SEC”) adopted new regulations governing the use of derivatives by registered investment companies (“Rule 18f-4”). Funds will be required to implement and comply with Rule 18f-4 by August 19, 2022. Once implemented, Rule 18f-4 will impose limits on the amount of derivatives a fund can enter into, eliminate the asset segregation framework currently used by funds to comply with Section 18 of the 1940 Act, treat derivatives as senior securities and require funds whose use of derivatives is more than a limited specified exposure amount to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager. The Fund does not currently enter into derivatives transactions. Management is currently evaluating the potential impact of Rule 18f-4 on the Fund.

In December 2020, the SEC adopted a new rule providing a framework for fund valuation practices (“Rule 2a-5”). Rule 2a-5 establishes requirements for determining fair value in good faith for purposes of the 1940 Act. Rule 2a-5 will permit fund boards to designate certain parties to perform fair value determinations, subject to board oversight and certain other conditions. Rule 2a-5 also defines when market quotations are “readily available” for purposes of the 1940 Act and the threshold for determining whether a fund must fair value a security. In connection with Rule 2a-5, the SEC also adopted related recordkeeping requirements and is rescinding previously issued guidance, including with respect to the role of a board in determining fair value and the accounting and auditing of fund investments. The Fund will be required to comply with the rules by September 8, 2022. Management is currently assessing the potential impact of the new rules on the Fund’s financial statements.

Events Subsequent to the Fiscal Year End – In preparing the financial statements as of November 30, 2021, management considered the impact of subsequent events for the potential recognition or disclosure in these financial statements. Management has determined there were no subsequent events that would need to be disclosed in the Fund’s financial statements.

Note 3 – Securities Valuation

The Fund has adopted authoritative fair value accounting standards which establish an authoritative definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value, a discussion in changes in valuation techniques and related inputs during the period and expanded disclosure of valuation levels for major security types. These inputs are summarized in the three broad levels listed below:

- Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access.
- Level 2 – Observable inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.
- Level 3 – Unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Fund’s own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

Following is a description of the valuation techniques applied to the Fund's major categories of assets and liabilities measured at fair value on a recurring basis. The Fund's investments are carried at fair value.

The Fund determines the fair value of its investments and computes its net asset value per share as of the close of regular trading on the New York Stock Exchange (4:00 pm EST).

Corporate Bonds – Corporate bonds, including listed issues, are valued at market on the basis of valuations furnished by an independent pricing service which utilizes both dealer-supplied valuations and formula-based techniques. The pricing service may consider recently executed transactions in securities of the issuer or comparable issuers, market price quotations (where observable), bond spreads, and fundamental data relating to the issuer. Most corporate bonds are categorized in Level 2 of the fair value hierarchy.

Foreign Securities – Foreign economies may differ from the U.S. economy and individual foreign companies may differ from domestic companies in the same industry.

Foreign companies or entities are frequently not subject to accounting and financial reporting standards applicable to domestic companies, and there may be less information available about foreign issuers. Securities of foreign issuers are generally less liquid and more volatile than those of comparable domestic issuers. There is frequently less government regulation of broker-dealers and issuers than in the United States. In addition, investments in foreign countries are subject to the possibility of expropriation, confiscatory taxation, political or social instability or diplomatic developments that could adversely affect the value of those investments.

Mortgage- and Asset-Backed Securities – Mortgage- and asset-backed securities are securities issued as separate tranches, or classes, of securities within each deal. These securities are normally valued by pricing service providers that use broker-dealer quotations or valuation estimates from their internal pricing models. The pricing models for these securities usually consider tranche-level attributes, estimated cash flows and market-based yield spreads for each tranche, current market data and incorporate deal collateral performance, as available. Mortgage- and asset-backed securities that use similar valuation techniques and inputs as described above are categorized as Level 2 of the fair value hierarchy.

U.S. Government Securities – U.S. Government securities are normally valued using a model that incorporates market observable data such as reported sales of similar securities, broker quotes, yields, bids, offers, and reference data. Certain securities are valued principally using dealer quotations. U.S. Government securities are typically categorized in Level 2 of the fair value hierarchy.

U.S. Government Agency Securities – U.S. government agency securities are comprised of two main categories consisting of agency issued debt and mortgage pass-throughs. Agency issued debt securities are generally valued in a manner similar to U.S. government securities. Mortgage pass-throughs include to-be-announced (“TBAs”) securities and mortgage pass-through certificates. TBA securities and mortgage pass-throughs are generally valued using dealer quotations. These securities are typically categorized in Level 2 of the fair value hierarchy.

Investment Companies – Investments in open-end mutual funds, including money market funds, are generally priced at their net asset value per share provided by the service agent of the funds and will be classified in Level 1 of the fair value hierarchy.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

Short-Term Securities – Short-term debt securities, including those securities having a maturity of 60 days or less, are valued at the evaluated mean between the bid and asked prices. To the extent the inputs are observable and timely, these securities would be classified in Level 2 of the fair value hierarchy.

Restricted Securities – The Fund may invest in securities that are subject to legal or contractual restrictions on resale (“restricted securities”). Restricted securities may be resold in transactions that are exempt from registration under the Federal securities laws. Private placement securities are generally considered to be restricted except for those securities traded between qualified institutional investors under the provisions of Rule 144A of the Securities Act of 1933. The sale or other disposition of these securities may involve additional expenses and the prompt sale of these securities at an acceptable price may be difficult. At November 30, 2021, the Fund held securities issued pursuant to Rule 144A under the Securities Act of 1933. There were no other restricted investments held by the Fund at November 30, 2021.

The Board of Trustees (“Board”) has delegated day-to-day valuation issues to a Valuation Committee of the Trust which is comprised of representatives from the Fund’s administrator, U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Fund Services”). The function of the Valuation Committee is to value securities where current and reliable market quotations are not readily available, or the closing price does not represent fair value by following procedures approved by the Board. These procedures consider many factors, including the type of security, size of holding, trading volume and news events. All actions taken by the Valuation Committee are subsequently reviewed and ratified by the Board.

Depending on the relative significance of the valuation inputs, fair valued securities may be classified in either Level 2 or Level 3 of the fair value hierarchy.

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Fund’s securities as of November 30, 2021:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Fixed Income				
Asset-Backed Securities	\$ —	\$ 1,196,616	\$ —	\$ 1,196,616

Refer to the Fund’s schedule of investments for a detailed break-out of securities by industry classification.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

The following is a reconciliation of the Fund’s Level 3 investments for which significant unobservable inputs were used in determining value.

Investments in Securities, at Value	
<u>Mortgage-Backed Securities</u>	
Balance as of November 30, 2020	\$ —
Accrued discounts/premiums	—
Realized gain/(loss)	—
Change in unrealized appreciation/(depreciation)	(2,835)
Purchases	2,985,023
Sales	—
Transfers in and/or out of Level 3	—
Balance as of November 30, 2021	<u>\$2,982,188</u>

The change in unrealized appreciation/(depreciation) for Level 3 securities still held at November 30, 2021, and still classified as Level 3 was \$(2,835).

The global outbreak of COVID-19 (commonly referred to as “coronavirus”) has disrupted economic markets and the prolonged economic impact is uncertain. The ultimate economic fallout from the pandemic, and the long-term impact on economies, markets, industries and individual issuers, are not known. The operational and financial performance of the issuers of securities in which the Fund invests depends on future developments, including the duration and spread of the outbreak, and such uncertainty may in turn adversely affect the value and liquidity of the Fund’s investments, impair the Fund’s ability to satisfy redemption requests, and negatively impact the Fund’s performance.

Note 4 – Investment Advisory Fee and other Transactions with Affiliates

The Fund has an investment advisory agreement with Pacific Income Advisers, Inc. (“PIA” or the “Adviser”) pursuant to which the Adviser is responsible for providing investment management services to the Fund. The Adviser furnishes all investment advice, office space and facilities, and provides most of the personnel needed by the Fund. As compensation for its services, PIA is entitled to a fee, computed daily and payable monthly. The Fund pays fees calculated at an annual rate of 0.20% based upon the average daily net assets of the Fund. For the year ended November 30, 2021, the Fund incurred \$328,634 in advisory fees.

The Fund is responsible for its own operating expenses. The Adviser has contractually agreed to reduce fees payable to it by the Fund and to pay Fund operating expenses to the extent necessary to limit the Fund’s aggregate annual operating expenses (excluding acquired fund fees and expenses) to 0.39% of the average daily net assets. Any such reduction made by the Adviser in its fees or payment of expenses which are the Fund’s obligation are subject to reimbursement by the Fund to the Adviser, if so requested by the Adviser, in any subsequent month in the 36-month period from the date of the management fee reduction and expense payment if the aggregate amount actually paid by the Fund toward the operating expenses for such fiscal year (taking into account the reimbursement) will not cause the Fund to exceed the lesser of: (1) the expense limitation in place at the time of the management fee reduction and expense payment; or (2) the expense limitation in place at the time of the reimbursement. Any such reimbursement is also

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

contingent upon Board of Trustees review and approval. Such reimbursement may not be paid prior to the Fund’s payment of current ordinary operating expenses. For the year ended November 30, 2021, the Adviser reduced its fees and/or absorbed Fund expenses in the amount of \$73,303; no amounts were reimbursed to the Adviser. The Adviser may recapture portions of the amounts shown below no later than the corresponding dates:

<u>Date</u>	<u>Amount</u>
11/30/22	\$ 88,829
11/30/23	59,420
11/30/24	73,303
	<u>\$221,552</u>

Fund Services serves as the Fund’s administrator, fund accountant and transfer agent. U.S. Bank N.A. serves as custodian (the “Custodian”) to the Fund. The Custodian is an affiliate of Fund Services. Fund Services maintains the Fund’s books and records, calculates the Fund’s NAV, prepares various federal and state regulatory filings, coordinates the payment of fund expenses, reviews expense accruals and prepares materials supplied to the Board of Trustees. The officers of the Trust, including the Chief Compliance Officer, are employees of Fund Services. Fees paid by the Fund for administration and accounting, transfer agency, custody and compliance services for the year ended November 30, 2021, are disclosed in the Statement of Operations.

The Fund has entered into agreements with various brokers, dealers and financial intermediaries to compensate them for transfer agent services that would otherwise be executed by Fund Services. These sub-transfer agent services include pre-processing and quality control of new accounts, maintaining detailed shareholder account records, shareholder correspondence, answering customer inquiries regarding account status, and facilitating shareholder telephone transactions. The Fund expensed \$39,135 of sub-transfer agent fees during the year ended November 30, 2021. These fees are included in the transfer agent fees and expenses amount disclosed in the Statement of Operations.

Quasar Distributors, LLC (“Quasar”) acts as the Fund’s principal underwriter in a continuous public offering of the Fund’s shares. Quasar is a wholly-owned broker-dealer subsidiary of Foreside Financial Group, LLC. On July 7, 2021, Foreside announced that it had entered into a definitive purchase and sale agreement with Genstar Capital (“Genstar”) such that Genstar would acquire a majority stake in Foreside. The Board approved continuing the distribution agreement with Quasar at the close of the transaction which occurred on September 30, 2021.

Note 5 – Purchases and Sales of Securities

For the year ended November 30, 2021, the cost of purchases and the proceeds from sales of securities, excluding short-term securities, were as follows:

<u>Non-Government</u>		<u>Government</u>	
<u>Purchases</u>	<u>Sales</u>	<u>Purchases</u>	<u>Sales</u>
\$59,437,709	\$52,245,526	\$9,135,030	\$67,255,886

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

Note 6 – Line of Credit

The Fund has a secured line of credit in the amount of \$15,000,000. The line of credit is intended to provide short-term financing, if necessary, subject to certain restrictions, in connection with shareholder redemptions. The credit facility is with the Fund’s custodian, U.S. Bank N.A. The Fund did not draw upon its line of credit during the year ended November 30, 2021.

Note 7 – Federal Income Tax Information

The tax character of distributions paid during the years ended November 30, 2021 and November 30, 2020 are as follows:

	<u>November 30, 2021</u>	<u>November 30, 2020</u>
Ordinary income	\$1,333,355	\$2,540,206

As of November 30, 2021, the components of accumulated earnings/(losses) on a tax basis were as follows:

Cost of investments (a)	\$142,132,322
Gross unrealized appreciation	756,010
Gross unrealized depreciation	(208,228)
Net unrealized appreciation (a)	547,782
Undistributed ordinary income	15,495
Undistributed long-term capital gains	—
Total distributable earnings	15,495
Other accumulated losses	(219,657)
Total accumulated earnings/(losses)	\$ 343,620

(a) The book-basis and tax-basis net unrealized depreciation are the same.

The Fund had tax capital losses which may be carried over to offset future gains. Such losses expire as follows:

<u>Short-Term Indefinite</u>	<u>Long-Term Indefinite</u>	<u>Total</u>
\$219,657	\$ —	\$219,657

The Fund utilized \$180,068 of long-term capital loss carryover during the year ended November 30, 2021.

Note 8 – Principal Risks

Below is a summary of some, but not all, of the principal risks of investing in the Fund, each of which may adversely affect the Fund’s net asset value and total return. The Fund’s most recent prospectus provides further descriptions of the Fund’s investment objective, principal investment strategies and principal risks.

- **Market and Regulatory Risk.** Events in the financial markets and economy may cause volatility and uncertainty and adversely impact the Fund’s performance. Traditionally liquid investments may experience periods of diminished liquidity. Governmental and regulatory actions, including tax law changes, may also impair portfolio management and have unexpected or adverse consequences on particular markets, strategies, or investments. The Fund’s investments may decline in value due to factors affecting individual issuers (such as the results of supply

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

and demand), or sectors within the securities markets. The value of a security or other investment also may go up or down due to general market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions, changes in interest rates or exchange rates, or adverse investor sentiment generally. In addition, unexpected events and their aftermaths, such as the spread of deadly diseases; natural, environmental or man-made disasters; financial, political or social disruptions; terrorism and war; and other tragedies or catastrophes, can cause investor fear and panic, which can adversely affect the economies of many companies, sectors, nations, regions and the market in general, in ways that cannot necessarily be foreseen.

- **U.S. Government Securities Risk.** Some U.S. Government securities, such as Treasury bills, notes, and bonds and mortgage-backed securities guaranteed by the Government National Mortgage Association (Ginnie Mae), are supported by the full faith and credit of the United States; others are supported by the right of the issuer to borrow from the U.S. Treasury; others are supported by the discretionary authority of the U.S. Government to purchase the agency's obligations; still others are supported only by the credit of the issuing agency, instrumentality, or enterprise. Although U.S. Government-sponsored enterprises may be chartered or sponsored by Congress, they are not funded by Congressional appropriations, and their securities are not issued by the U.S. Treasury, their obligations are not supported by the full faith and credit of the U.S. Government, and so investments in their securities or obligations issued by them involve greater risk than investments in other types of U.S. Government securities. In addition, certain governmental entities have been subject to regulatory scrutiny regarding their accounting policies and practices and other concerns that may result in legislation, changes in regulatory oversight and/or other consequences that could adversely affect the credit quality, availability or investment character of securities issued or guaranteed by these entities.
- **Counterparty Risk.** Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Fund. Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. A counterparty's inability to fulfill its obligation may result in significant financial loss to the Fund.
- **Credit Risk.** The issuers of the bonds and other debt securities held by the Fund may not be able to make interest or principal payments.
- **Interest Rate Risk.** The value of the Fund's investments in fixed-income securities will change based on changes in interest rates. If interest rates increase, the value of these investments generally declines. Securities with greater interest rate sensitivity and longer maturities generally are subject to greater fluctuations in value.
- **Prepayment Risk.** Issuers of securities held by the Fund may be able to prepay principal due on these securities, particularly during periods of declining interest rates. Securities subject to prepayment risk generally offer less potential for gains when interest rates decline, and may offer a greater potential for loss when interest rates rise. When debt obligations are prepaid or when securities are called, the Fund may have to reinvest in securities with a lower yield. Prepayment risk is a major risk of mortgage-backed securities.
- **Extension Risk.** An issuer may pay principal on an obligation held by the Fund (such as an asset-backed or mortgage-backed security) later than expected. This may happen during a period of rising interest rates. Under these circumstances, the value of the obligation will decrease.

PIA Short-Term Securities Fund

Notes to Financial Statements – November 30, 2021 (continued)

- **Risks Associated with Asset-Backed Securities.** These include Market and Regulatory Risk, Interest Rate Risk, Credit Risk, Prepayment Risk and Extension Risk (each described above). Asset-backed securities may decline in value when defaults on the underlying assets occur and may exhibit additional volatility in periods of changing interest rates.
- **Risks Associated with Mortgage-Backed Securities.** These include Market and Regulatory Risk, Interest Rate Risk, Credit Risk, Prepayment Risk and Extension Risk (each described above) as well as the risk that the structure of certain mortgage-backed securities may make their reaction to interest rates and other factors difficult to predict, making their prices very volatile. In particular, events related to the U.S. housing market in recent years had a severe negative impact on the value of some mortgage-backed securities and resulted in an increased risk associated with investments in the securities.
- **Liquidity Risk.** Reduced liquidity in the bond markets can result from a number of events, such as limited trading activity, reductions in bond inventory, and rapid or unexpected changes in interest rates. Less liquid markets could lead to greater price volatility and limit the Fund's ability to sell a holding at a suitable price.
- **Rule 144A Securities Risk.** The market for Rule 144A securities typically is less active than the market for publicly-traded securities. Rule 144A securities carry the risk that the liquidity of these securities may become impaired, making it more difficult for the Fund to sell these securities.
- **Adjustable Rate and Floating Rate Securities Risks.** Although adjustable and floating rate debt securities tend to be less volatile than fixed-rate debt securities, they nevertheless fluctuate in value.
- **High Yield Securities Risk.** Securities with ratings lower than BBB- or Baa3 are known as "high yield" securities (commonly known as "junk bonds"). High yield securities typically carry higher coupon rates than investment grade securities, but also are considered as speculative and may be subject to greater market price fluctuations, less liquidity and greater risk of loss of income or principal including greater possibility of default and bankruptcy of the issuer of such instruments than more highly rated bonds and loans.

Note 9 – Control Ownership

The beneficial ownership, either directly or indirectly of more than 25% of the voting securities of a Fund creates a presumption of control of the Fund, under Section 2(a)(9) of the 1940 Act. As of November 30, 2021, Capinco C/O U.S. Bank NA, for the benefit of their customers, owned 37.52% of the outstanding shares of the Fund.

Note 11 – Other Tax Information (Unaudited)

For the year ended November 30, 2021, the Short-Term Securities Fund designated \$1,333,355 as ordinary income for purposes of the dividends paid deduction. For the year ended November 30, 2021, none of the dividends paid from net investment income qualifies for the dividend received deduction available to corporate shareholders of the Fund. For shareholders in the Fund, none of the dividend income distributed for the year ended November 30, 2021 is designated as qualified dividend income under the Jobs and Growth Relief Act of 2003.

On December 29, 2021, the Short-Term Securities Fund distributed \$0.00706583, per share of net investment income.

PIA Short-Term Securities Fund

Report of Independent Registered Public Accounting Firm

**To the Board of Trustees
Advisors Series Trust and
Shareholders of
PIA Short-Term Securities Fund**

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of the PIA Short-Term Securities Fund, a series of Advisors Series Trust (the “Trust”), including the schedule of investments, as of November 30, 2021, the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, financial highlights for each of the five years in the period then ended, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of November 30, 2021, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We have served as the auditor of one or more of the funds in the Trust since 2003.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of November 30, 2021 by correspondence with the custodian and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinion.

How to Obtain a Copy of the Fund’s Proxy Voting Policies

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling 1-800-251-1970, or on the Securities and Exchange Commission’s (“SEC”) website at <http://www.sec.gov>.

How to Obtain a Copy of the Fund’s Proxy Voting Records for the 12-Month Period Ended June 30

Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available without charge, upon request, by calling 1-800-251-1970. Furthermore, you can obtain the Fund’s proxy voting records on the SEC’s website at <http://www.sec.gov>.

Quarterly Filings on Form N-PORT

The Fund files its complete schedules of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Part F of Form N-PORT. The Fund’s Form N-PORT is available on the SEC’s website at <http://www.sec.gov>. Information included in the Fund’s Form N-PORT is also available by calling 1-800-251-1970.

Householding

In an effort to decrease costs, the Fund will reduce the number of duplicate prospectuses, supplements, and certain other shareholder documents that you receive by sending only one copy of each to those addresses shown by two or more accounts. Please call the Fund’s transfer agent toll free at 1-800-251-1970 to request individual copies of these documents. The Fund will begin sending individual copies 30 days after receiving your request. This policy does not apply to account statements.

PIA Short-Term Securities Fund

Statement Regarding Liquidity Risk Management Program (Unaudited)

The Fund has adopted a liquidity risk management program (the “program”). The Board has designated a committee at the Adviser to serve as the administrator of the program. The Adviser’s committee conducts the day-to-day operation of the program pursuant to policies and procedures administered by the committee.

Under the program, the Adviser’s committee manages the Fund’s liquidity risk, which is the risk that the Fund could not meet shareholder redemption requests without significant dilution of remaining shareholders’ interests in the Fund. This risk is managed by monitoring the degree of liquidity of the Fund’s investments, limiting the amount of the Fund’s illiquid investments, and utilizing various risk management tools and facilities available to the Fund for meeting shareholder redemptions, among other means. The committee’s process of determining the degree of liquidity of the Fund’s investments is supported by one or more third-party liquidity assessment vendors.

The Board reviewed a report prepared by the committee regarding the operation and effectiveness of the program for the period June 1, 2020 through June 30, 2021. No significant liquidity events impacting the Fund were noted in the report. In addition, the committee provided its assessment that the program had been effective in managing the Fund’s liquidity risk.

PIA Short-Term Securities Fund

Information About Trustees and Officers (Unaudited)

This chart provides information about the Trustees and Officers who oversee the Fund. Officers elected by the Trustees manage the day-to-day operations of the Fund and execute policies formulated by the Trustees.
